SK MILK MARKETING BOARD

UPDATE

October 15, 2010

ADMINISTRATIVE CHANGES – OCTOBER 1, 2010

Due to the organization change from the Saskatchewan Milk Control Board to the Saskatchewan Milk Marketing Board (SMMB) on October 1, 2010, there are a few administrative changes that producers should be aware of.

1. Effective immediately, please make all cheques for quota transactions payable to the **SK Milk Marketing Board.**
2. We will be making changes to the website over the next few weeks to reflect the organization change. The SMMB website address is www.saskmilk.ca
3. The general email address for the SMMB office is info@saskmilk.ca .
4. The other office email addresses will continue to be operational until further notice.

The SMMB will advise if further administrative changes occur. If you have any questions, please contact the SMMB office at (306) 787-5319.

PRODUCER MEETINGS – OCTOBER 2010

QUOTA EXCHANGE

The market-clearing price established for the October, 2010 Quota Exchange was $23,370.00. The results of the Quota Exchange are outlined in the following Table.

The next Quota Exchange will be held on November 15, 2010. All offers to sell and bids to purchase quota through the Quota Exchange must be received at the SMMB office by midnight, November 6, 2010. The SMMB recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

Just a reminder to producers that when making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange.

The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase.

HOW TO BUY OR SELL DAILY QUOTA ON THE EXCHANGE

With the change from annual quota to a daily quota, there are some changes to submitting bids on the Quota Exchange. There are two steps to convert your bid, whether buying or selling, from annual to daily quota. For the purposes of this example, an annual quota bid of 3,000 kgs of butterfat at $60.00/kg will be converted to a daily quota bid.

Step 1: Convert annual kgs of butterfat to daily kgs of butterfat.

3,000 kgs ÷ 365 = 8.22 kgs/day (Daily Quota is calculated up to 2 decimal places)

Step 2: Convert bid to dollars per kg per day

$60 × 365 = $21,900.00

Therefore, the bid, whether buying or selling would be:

- 8.22 kgs/day at the price of $21,900 to obtain an equivalent bid of 3,000 kgs at $60/kg under the annual quota policy.

The monetary value of this bid would be:

8.22 kgs/day × $21,900/kg = $180,018

PRODUCER TRANSFER CREDIT LIST

The SMMB will be maintaining a Producer Transfer Credit list to assist producers in transferring credits (in or out) with another producer.

Producers wanting to transfer credits (in or out) with another producer can contact the SMMB office to have their name added to the Producer Transfer Credit List. This list is posted on the SMMB website and is also available by weekly email or upon request by fax, email, or regular mail. The SMMB will also enclose the list with the monthly newsletter.

The transfer credit list will be updated on a daily basis as requests come into the office. Postings will be dated and kept on the list for two months. It is up to the producer to contact the SMMB to repost their name after the two month period is up, or to have their name removed from the list if it is no longer required. Producers may contact the office at 787-5319 or 787-6457 for additional assistance.

In September, Saskatchewan had a monthly CDC allocation of **727,716 kilograms** of butterfat. In the month of September, Saskatchewan production was **-54,196 kilograms** of butterfat **under** and cumulatively **under** by **-129,713 kilograms** of butterfat. On a percentage basis, Saskatchewan is at **-2.00%** within our CDC allocation flexibility limits based on the Continuous Quota model. The -1.50% lower limit (up to -2.00% if the WMP is above -1.50%) is in effect August 2010.

PROVINCIAL POOLED TRANSPORTATION RATE CHANGE

The SMMB recently reviewed the Saskatchewan operations financial report of Agrifoods International Cooperative Ltd. for the 12 month period ending July 2009. It was determined that the cost of providing the milk transportation service has not changed overall. However, a decrease in the volumes being shipped has resulted in a decrease in revenues for Agrifoods creating a revenue gap of 7.6%.

To partially offset this current imbalance, Agrifoods requested a rate increase of 5%. Following a review of these rates, the SMMB approved a rate increase of 5%, to be applied to the provincial pooled haulage rate. The rate increase will be applied over the next two month end periods.

Agrifoods also requested that the frequency of financial reviews be semi-annual, rather than annual, so that rates are more responsive to cost changes. The SMMB agreed that transportation costs would be reviewed every six months and that if milk volumes increase in the future the SMMB will pursue a corresponding reduction in the transportation rate.

The SMMB is committed to ensuring that transportation costs are as efficient as possible. Over the past year the Western Milk Pool has been exploring options to improve milk transportation efficiencies. This work will continue into next year. The outcomes of this work have not been determined at this time; however the SMMB will update producers when the outcomes become available.

Frequently Asked Questions

A list has been compiled of questions most frequently asked by producers.

When will I get my 4M dollars back?

The following condition must have been met to get back the 4M dollars held by the Board:

When July 31, 2010 production is reconciled, a producer must be at or below zero cumulative kgs of butterfat. If a producer is still at positive credits or positive credit days, **no 4M dollars will be refunded.**

These dollars will be added into the September, 2010 month-end pool and paid out by October 15, 2010. All producers will share in these dollars.

What is the maximum amount of transfer credits that I can transfer out in a 12 month period?

Effective September, 2010, to March, 2011 the 15% transfer out credit limit in a rolling 12 month period has been suspended. There is no limit on the % of transfer credits that can be transferred out over the next seven months, however, the restrictions on the amount that can be transferred out on a monthly basis still apply. (REFER TO THE NEXT QUESTION)

What is the maximum amount of transfer credits that I can transfer out in a month?

The maximum transfer credits a producer can transfer out in a month are equal to what the producer's cumulative under position was in the previous month. You can only transfer out to a cumulative position of zero credits.

What is the maximum amount of transfer credits that I can transfer in?

There is no limit to the amount of credits that can be transferred in within a rolling 12 month period. The only limit when transferring in credits would be to not drop below the -30 credit day limit **(-20 credit days effective the end of November)** at the end of each month or you will have lost the opportunity to carry-forward those credits to produce that milk in the future.

Will my credit position change on August 1, 2010 if I was in a pre-fill position with 4m dollars being withheld and do not achieve a cumulative credit position of 0 days or less by July 31, 2010, thereby forfeiting those 4m dollars?

No, your credit position will not change; you are still responsible for dealing with your positive credits.

What happens to my negative credits that I have accumulated if I exit the industry (sell out)? What if I stop shipping milk before the quota transfer date?

When selling out, your daily quota (TPQ) is transferred to the purchasing producer using the Quota Transfer Form. Accumulated negative transfer credits are transferred using the Transfer Credit Form and may or may not be transferred to the producer purchasing your daily quota depending on the deal that you have struck. The SMMB will calculate the final available negative credits accumulated.

If a producer ceases shipments at least one full calendar month prior to the quota transfer date, that producer may transfer 95% of the estimated negative transfer credits that would accumulate in the month that no milk was shipped for an effective date of the first of the same month. The final available negative credits, the remaining 5%, that would have accumulated prior to the transfer date will be calculated by the Board and be available for transfer.

For example, if a producer ceases shipping milk on August 31st with an effective sale date of October 1st, 95% of the estimated negative credits that will be accumulated in the month of September may be transferred for a September 1st effective date. In early October, the Board will calculate the final negative credit total and those negative credits may be transferred to another producer at that time.

What is the deadline for transferring negative credits if I exit the industry?

Producers who exit the industry will have the opportunity to transfer negative credits to other producers for a period of two months.

For example, if a producer exits the industry effective September 1st, that producer will have the opportunity to transfer any negative credits for the months of September and October. Any credits not transferred after that date will be lost. The deadline for transferring credits is the 20th of each month, therefore the deadline to transfer credits to another producer would be October 20th.

If my TPQ is reduced, either through a quota sale or quota reduction, and this causes me to exceed the +10 days cumulative position, what happens?

If a producer exceeds the +10 day limit as a direct result of a reduction in TPQ, that producer's TPQ will be capped at +10 days. No penalty will be assigned for exceeding the +10 day limit under this circumstance; however overproduction in the future will be penalized.

Are positive credit transfers permitted in farm splits?

No, positive credits cannot be transferred to another farm under any circumstance.

What is the deadline for transfer credits?

The transfer credit deadline for any month is by midnight of the 20th. For example any transfer credit forms in the Board Office on or before midnight of October 20th will be effective October 1st.

Where can I find producers wanting to transfer credits?

The Board will maintain a web page with producers wanting to transfer credits in or out. It will be updated on a daily basis as requests come into the office. Producers who do not have internet access can call the Board and have the information faxed to them.

Producers wanting their name posted on the web page can contact the Board. Postings will be dated and kept on the website for 2 months. It is up to the producer to have their name reposted after the 2 months or removed if they fill their requirement before the 2 month period is up.

INCENTIVE DAY CREDITS- Do incentive day credits change my cumulative position?

No. Incentive days credits do not change your cumulative position. In months where incentive day credits are available, first you fill your quota, then, if you are over your monthly quota the additional kilograms are applied against the incentive day credits. If your production does not exceed your monthly quota allocation you will not be able to use the incentive day credits.

You must use the incentive day credits in the month that they are available.
